

# Pulses Insights — database ERD

Office visitor analytics · PostgreSQL 18 · Location → Zone → Camera → Pulse

## Relationships

- location 1 : N zone — a zone belongs to exactly one location · FK zone.location\_id
- zone 1 : N camera — a camera watches exactly one zone · FK camera.zone\_id
- camera 1 : N pulse — a detection comes from exactly one camera · FK pulse.camera\_id

face\_id is not a foreign key — it is assigned by the vision system. count(distinct face\_id) = visitors, count(\*) = detections.

- PK** primary key
- FK** foreign key
- UK** unique constraint
